

Ostbayerische Technische Hochschule Amberg/Weiden
Department of Electrical Engineering, Media, and
Computer Science

Prof. Dr. Ulrich Schäfer

Project Mobile & Ubiquitous Computing Summer
Semester 2026

Group 03: Simon Völkl & Johannes Schieder

Courses of study: Artificial Intelligence, Industry-4.0-Informatics

June 8, 2026

Contents

1	Introduction	3
1.1	Intro	3
1.2	Mission Statement	3
1.3	Motivation	3
1.4	Document Structure	3
2	Related Work	3
3	Project Management	3
3.1	SMART	3
3.2	User Stories (Requirements)	3
3.3	MVP	3
3.4	Extensions	3
3.5	Task Distribution	3
4	Technical Concept	3
4.1	High-Level Architecture	3
4.2	Components	3

5	Hardware	3
5.1	Components (ESP32) in Detail	3
5.2	Sensor Data Acquisition	3
5.3	Physics Simulation	3
5.4	Display	3
5.5	MQTT Topics & Payloads	3
6	Node-RED	3
6.1	Workflow	3
6.2	Dashboard & User Input	3
7	Android App	3
7.1	Software Components, Classes, Views	3
7.2	Dashboard & User Input	3
8	Evaluation	3
8.1	Problems & Solutions	3
8.2	Code Coverage	4
8.3	Cost Estimation	4
9	Summary	4
9.1	Summary & Future Work	4
A	Prompts	4
B	ESP32 Code	4

Abstract

1 Introduction

1.1 Intro

1.2 Mission Statement

1.3 Motivation

1.4 Document Structure

2 Related Work

3 Project Management

3.1 SMART

3.2 User Stories (Requirements)

3.3 MVP

3.4 Extensions

3.5 Task Distribution

4 Technical Concept

4.1 High-Level Architecture

4.2 Components

5 Hardware

5.1 Components (ESP32) in Detail

5.2 Sensor Data Acquisition

5.3 Physics Simulation

5.4 Display

5.5 MQTT Topics & Payloads

6 Node-RED

6.1 Workflow

6.2 Dashboard & User Input

7 Android App

dashboard.

8.2 Code Coverage

8.3 Cost Estimation

9 Summary

9.1 Summary & Future Work

A Prompts

B ESP32 Code
